

SCHEDULE A
to the
June 29, 2020 Council Meeting

From: David & Monique

Sent: June-28-20 9:02 PM

Subject: site alteration file no. 3000-004-20

I'm sure this is too late but I have a few questions. On picture on back it says berm is not in this application but they are building it now. It's up to track height. How high do they plan make it because if it gets higher the sound of the train will be deflected back at Northridge and its survey. If so a berm or wall needs to be put on other side of track. We now have a pothole at their entrance on Grimsby 5 which needs to be fixed and a line need to be painted down middle of Grimsby 5. Have been almost forced in ditch by trucks going to site. Maybe line will keep them on their side of the road. We are also getting dust from the site my car gets a good amount on it at times. Anything that can be done will help.
